

# AEROHIVE CONNECT

Cloud Managed. Enterprise Connectivity. Unlimited Potential.

## The Aerohive Connect solution enables robust Wi-Fi for any budget

**Connect** provides cloud-managed connectivity built on Aerohive's industry-first cooperative control Wi-Fi focused on optimizing speed and resilience. **Connect** is centrally managed from the cloud, allowing for simple, fast, and powerful management.

### KEY BENEFITS

Self-organizing and self-healing access with the best balance of coverage, capacity, and performance

Harness the power of the cloud for centralized management, visibility, and troubleshooting

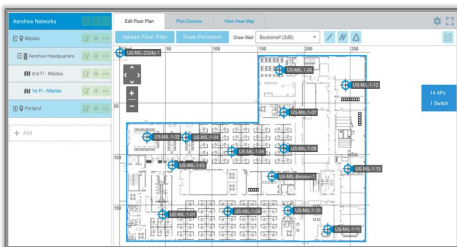

Interactive, forum-based support with optional callback service

**READY. SET. CONNECT.**

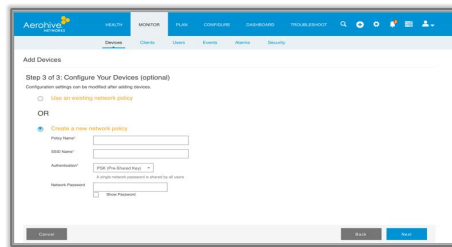

### FEATURES

#### PLAN

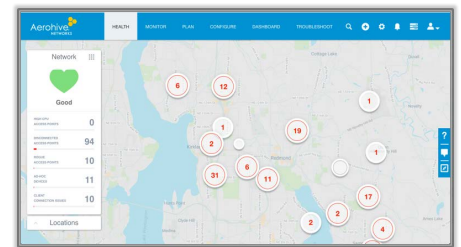

Integrated Planning Tool streamlines the planning & deployment process from start to finish

#### CONFIGURE

Simple, intuitive workflow to configure an enterprise policy in fewer than 5 clicks!

#### DEPLOY

Deploy policies and manage 1 to 100,000s of devices from a single centralized interface

## AEROHIVE INSIGHT

Enterprise connectivity requirements are changing, and with it, so are the opportunities to change how we engage customers - in retail stores, in healthcare facilities, or in any enterprise. Discover value beyond connectivity with Aerohive Insight, delivering a powerful ecosystem of IT and business-transforming applications. Insight can be added to Connect or Select solutions.

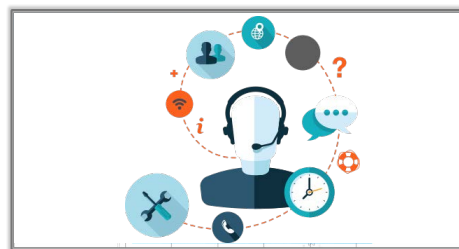

## AEROHIVE SELECT

Upgrade your services and elevate your experience with advanced features and deployment options with our Select portfolio of products and options.

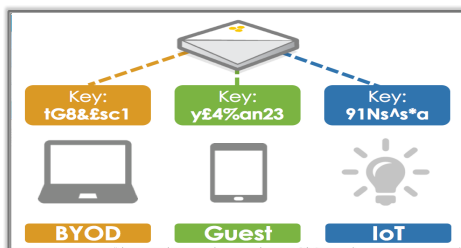

Visibility and Optimization for thousands of apps – including your own custom applications!

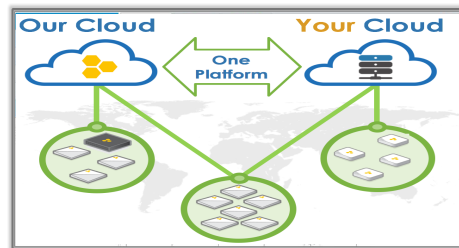

From planning to maintenance, world-class support packages offer true value and lasting satisfaction with our service and products

## Don't just connect. Control the Connected Experience.

Enhanced security options that allow you to customize policies based on the identity of the user, type of device, location on the network, and even time of day

Unparalleled flexibility with deployment models that best fit requirements and budget – in the public cloud, or on-premises in your own private datacenter.
