DMSS v1.2

Powerful.

DMSS allows you to stream video in 3G, 4G, 5G or Wi-Fi and offers extended professional functions such as Fisheye dewarping, pan/tilt/zoom control, and wiper activation.

Intuitive.

DMSS is streamlined with a simple, intuitive interface to quickly add Dahua devices, including network cameras, NVRs, HDCVI DVRs, Video Intercom, and alarms.
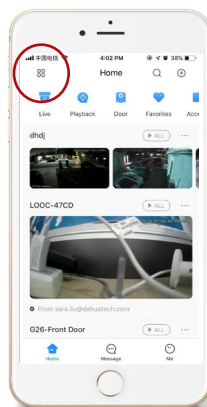

On the Go.

The free app makes it easy to select a device for playback and apply recording filters to play the video you need.

Display Mode

DMSS offers two modes to display your devices. The Grid mode displays cameos of live video from each device, while the List mode shows a list of devices and groups and displays an icon that helps to identify the device type.
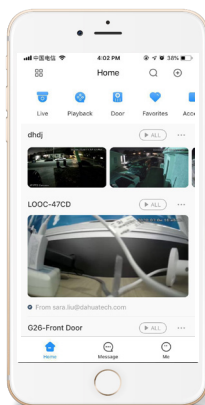

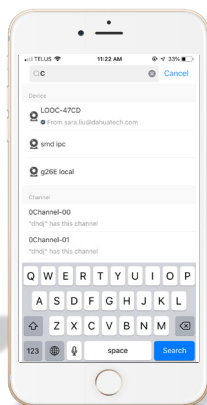

Grid Display Mode

List Display Mode

Quick Search

Quick Search allows you to find a specific device across all channels. Tap the Main Menu icon to access the Quick Search input bar.

**Click top right icon for pull down menu**

Type your search criteria

Messages

Shows messages from past seven days; combines local, account, and system messages in one screen making it easy to review all messages at once.
