

JOAN

JOAN BOARD

All your meeting rooms on one screen.

JOAN Board is a product in the line of JOAN room scheduling solutions that shows at a single glance which meeting rooms in the building are taken and which are still available to use.

Employees on the go will love it. It provides an overview of room availability when not at the meeting room door, continuing the mission of making workplaces smarter through the use of intuitive, sustainable technology.

Acting as wayfinding, the JOAN Board also plays an important part in making visitors feel welcome and reducing the stress of finding the way to a particular meeting.

Ultra power-efficient and completely wireless, it can be installed absolutely anywhere – in the reception area, lobby, hall or in a shared space. The non-intrusive, elegant nature of electronic paper beautifully blends with office design and does not distract with the glare LCDs produce.

Shows the status of up to 9 meeting rooms on a single screen.

Works with all mainstream calendars.

No wires. An easy, zero-cost installation.

99% more power efficient than other displays.

Glance & go.

With the JOAN Board you:

- Immediately see key meeting information such as room name and location, meeting name and time, and room status indicated in black (in use) or white (vacant).
- Reflect your brand and customize JOAN Board with your logo and a custom message that greets your guests and shows your company culture.

Easy to use & simple to manage.

JOAN Board delivers powerful room scheduling features with simplicity and ease.

It seamlessly connects to your company calendar and supports G Suite (Google Calendar), Office 365, Microsoft Exchange (Outlook) and iCalendar (.ics).

The JOAN Board is a completely wireless display that can be attached to any surface with a custom Magnetic Mount included with the device, or alternatively, with a standard VESA mount. JOAN Board allows for a simple, hassle-free, zero cost installation with no expensive wiring or hidden costs.

And if you'd like to go green at your company, JOAN Board is the perfect way to do that. It features a spectacular battery life of up to a year and is 99% more energy-efficient than any other display in existence. Due to its epaper technology, it is ideally suited for room signage and is completely unbeatable when it comes to energy consumption.

Simple.

JOAN products are designed based on user feedback to be the simplest and most intuitive room scheduling solutions out there, whether it's for the user or the administrator. You can host them on a simple cloud subscription basis or on-premises for free.

Complete.

JOAN is an all-in-one solution for reserving your meeting spaces and the only room booking solution developed from the ground up specifically for room signage. Meet better. Work better. And do more. Anywhere. Anytime. With JOAN.

Secure.

Our extensive experience in global deployments, combined with our communications and server expertise, helps ensure that JOAN is secure and reliable.

Open.

The JOAN API and integrations are the key to helping you create your smart office. Customize your existing processes and workstreams with JOAN's easy-to-use integrations and bots.

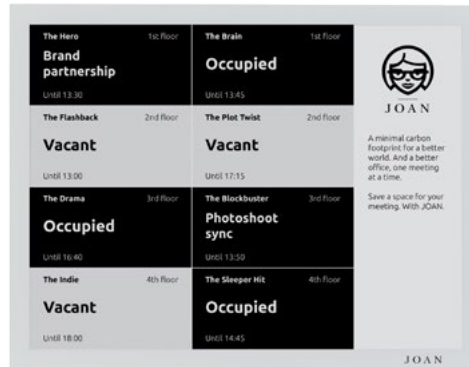

Next steps.

A smarter office.

JOAN products are made to work together. Combine the 13.3-inch JOAN Board with the 6-inch JOAN Manager or JOAN Executive devices and create your smart office.

Allow people to reserve their meeting rooms not only through the company calendar but also on the spot, at the meeting room door, whenever they need. Have people check into their meetings before or after the start of the meeting so rooms can free up if nobody shows up. Change the way people collaborate within your office. This is room booking with JOAN.

Place JOAN Boards into your reception area, lobby, or frequented areas so people have the information they need whenever they need it, and fix JOAN Managers or JOAN Executives onto your meeting room doors to give them the option of booking on the spot as well as through the company calendar.

Have JOAN take care of all your room booking needs.

Powering a new era of innovation.

Visionect developed the JOAN product line on its groundbreaking Place & Play technology after a decade of research and global deployments of epaper signage. The world leader in deploying electronic paper in environments impossible before, Visionect keeps setting new standards in versatile, ultra energy-efficient digital signs. Our products and solutions are conquering the globe, from New York to Tokyo, worldwide.
