

cAP series

The cAP is a small AP device with one ethernet port, it supports powering by PoE and optionally can be managed by the CAPsMAN management server.

Powering

The device accepts powering from Ethernet port (Passive PoE only). Under maximum load, the power consumption of this device is 4W

Connecting

1. Connect the provided PoE injector to your ISP router or switch, and use an ethernet cable to connect the injector to the cAP unit
2. Connect the provided power supply unit to the PoE injector, to power up the cAP
3. Wireless AP mode is enabled by default, you can connect to the SSID "MikroTik". Log into your router from your web browser by opening 192.168.88.1 in the address bar

Configuration

The device is preinstalled with MikroTik RouterOS software. It can be configured in several ways. More information here: <http://mt.lv/help>

Connect to wireless SSID "MikroTik" and open <http://192.168.88.1> in your web browser.

The username is **admin** and there is no password. In case IP connection is not available, the Winbox utility can be used to connect to the MAC address of the device.

By default, the device is preconfigured with a simple firewall on the Ethernet port, this configuration can be viewed when first connecting to the Router via Winbox. It will ask whether to keep this configuration or clean it to use your own.

Reset button

The reset button has three functions:

- Hold this button during boot time until LED light starts flashing, release the button to reset RouterOS configuration (total 5 seconds)
- Keep holding for 5 more seconds, LED turns solid, release now to turn on CAPs mode for managing the unit from a CAPsMAN server (total 10 seconds)
- Or Keep holding the button for 5 more seconds until until LED turns off, then release it to make the RouterBOARD look for Netinstall servers (total 15 seconds)

Operating System Support

This device supports RouterOS and is preinstalled with a RouterOS license. Downgrading below the factory version is not supported. It is suggested to upgrade RouterOS before using the device.

Federal Communication Commission Interference Statement

FCC ID: TV7RBCM2ND

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna must not be co-located or operation in conjunction with any other antenna or transmitter.

IMPORTANT: Exposure to Radio Frequency Radiation.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.

Antenna Installation. **WARNING:** It is installer's responsibility to ensure that when using the authorized antennas in the United States (or where FCC rules apply); only those antennas certified with the product are used. The use of any antenna other than those certified with the product is expressly forbidden in accordance to FCC rules CFR47 part 15.204. The installer should configure the output power level of antennas, according to country regulations and per antenna type. Professional installation is required of equipment with connectors to ensure compliance with health and safety issues.

Industry Canada (IC:7442A-CM2ND)

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
